

Weather and Seasons

Vocabulary

By the end of the unit children will know and recall:

- Antarctica
- Earth
- Equator
- rain, snow
- sunshine, wind
- season
- temperature

Key Facts

The months of the year:
January, February,
March, April, May,
June, July, August,
September, October,
November, December.

The seasons of the UK:
Autumn, Winter, Spring
and Summer

We will be exploring the weather and climate in many countries in the world!

In the UK, there are four different seasons. Each season has different weather types. Winter is cold, wet and windy. It snows in some areas and gets dark early. Spring brings warmer weather. Flowers start to grow and baby lambs are born. In summer, the weather becomes hotter; there is often less rain, but there may be thunderstorms. The weather starts to get colder in autumn. Leaves change colour and fall off the trees.

Ideas for home...

- Go on four season walks throughout the year! 😊 Take lots of photos!
- Can you make a season wheel and draw how the seasons look different?

Year 1 National Curriculum links
